PROFILE

Senior Software Engineer with 4+ years building high-throughput **Java/Spring Boot** microservices, **Kafka** event-driven systems, and **React.js** interfaces. Scaled a recommendation service from **50 to 4K TPS (~80x)** at Airtel and shipped a full-stack orchestration platform used by business teams across **6+ projects**.

TECHNICAL SKILLS

Backend: Java 17/21, Spring Boot 3.5, Spring WebFlux, Microservices, RESTful APIs, Hibernate, Apache Kafka, Event-Driven Architecture, Multithreading, HLD/LLD

Frontend: React.js, TypeScript, JavaScript, HTML, CSS, REST API Integration

Languages: Java, Kotlin, Python, TypeScript, JavaScript, SQL, PL/SQL, Shell

Databases: PostgreSQL, Oracle, MongoDB, Aerospike

Cloud & DevOps: AWS (S3), Docker, Kubernetes, OpenShift (OCP), Jenkins (CI/CD), Git, Bitbucket

Data & Observability: Airflow, dbt, ETL, Elasticsearch, Kibana, Metabase

Security & Testing: Keycloak, JWT, JUnit, REST Assured, Code Review, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Airtel Digital **07/2025 – Present**

- Scaled the recommendation service from 50 to **4K TPS (~80x)** by optimizing **Aerospike** caching, tuning **Kafka** consumers, and autoscaling **Kubernetes** pods on OpenShift (OCP).
- Cut real-time offer API response time from 5s+ to under 300ms (**~95% faster**) by building **Spring Boot** REST APIs serving **100K+ users**.
- Built a Recommendation Orchestration Platform with **React.js**, **Spring Boot**, and **AWS S3** (5+ role-based screens, sheet upload, **Keycloak/JWT** access control), letting business teams self-serve rollouts across **6+ projects**.
- Synchronized sheet/release versions and go-live timelines across **4+ downstream systems** by turning product requirements into UI workflows and APIs, with zero rule-mismatch errors.
- Engineered a source-to-mart **ETL pipeline** using **Airflow**, **dbt**, and an internal job scheduler, cutting pipeline failures by **35%**.
- Developed a **Python** AI error-triage tool (**Qdrant**, LLM) that analyzes **Kibana/Elasticsearch** logs, finds root causes, and drafts Bitbucket PRs, cutting repetitive-error triage effort by **70%+**.
- Cut incident response time by **35%** by setting up **Kibana** dashboards and alerting (**90% coverage** across production microservices), backed by **JUnit** and **REST Assured** tests on every service built.
- Mentored **4+ engineers** through PR reviews on readability, testing, and performance, and led sprint planning and daily standups.

Software Development Engineer – Backend | Freecharge **01/2025 – 06/2025**

- Built **Kotlin** microservices with **Spring WebFlux** and reactive programming for the Business Loan domain, integrating **10+ systems**.
- Designed an event-driven asynchronous architecture on **Apache Kafka**, improving throughput by **35%**.
- Optimized **MongoDB** queries and storage design, achieving **25% faster** data retrieval.
- Automated CI/CD with **Docker** and **Jenkins** on AWS, reducing deployment time by **40%**.

Associate Consultant | Oracle Financial Services Software **07/2022 – 11/2024**

- Designed **Java/Spring Boot** microservices exposing REST and SOAP APIs that handled **100K+ requests/day**.
- Led architecture and design reviews for multiple modules, cutting feature delivery time by **25%**.
- Resolved production issues (JDK upgrades, JAR conflicts, framework migrations), reducing incidents by **30%**.
- Tuned **Oracle DB** and **Hibernate** with multithreading and efficient data structures, improving response times by **35%**.

EDUCATION

B.Tech, Computer Science | DIT University, Dehradun | CGPA 8.43 **08/2018 – 05/2022**

COMMUNITY

- Core organizing committee member, National Hackathon 2.0, coordinating logistics for **200+ participants**.
